### WETLAND EDGE

This is a wetland and pond-edge seed mix for sites with stable, saturated soil conditions and good water quality. When established, the deep-rooted native plants will stabilize the soil and provide food and cover for many species of native fauna. Some plant species will spread to water depths of up to four inches. This seed mix includes at least 12 of 15 native permanent grass and sedge species and 19 of 26 native forb species. Apply at 36.63 PLS pounds per acre.
